Population living below the poverty line

3rd[4]
Ranking of countries most affected by natural disasters from 1993-2022

18.7%[5]
Children under 5 years old suffering from stunting

Honduras is considered one of the poorest countries in Central America and experiences high unemployment rates and chronic food insecurity.[2] Additionally, the people of Honduras suffer from poor diets and lack of nutritional education — resulting in a range of health issues, including stunting, vitamin and mineral deficiencies, and obesity.[3] All of these factors are compounded by extreme climate events like severe drought.[4] Convoy of Hope has provided humanitarian aid in Honduras since 1998. In 2011, Convoy of Hope began a nationwide Children's Feeding program in partnership with 46 other community organizations, schools, and churches. At minimum, Convoy of Hope provides meals every school day to children who are experiencing food insecurity. Convoy has also expanded programming to include Women's Empowerment and Agriculture to address long-term sustainability and development.

Your investment of $15,000 will ensure that 125 children are given a nutritious meal every school day.

Your investment of $25,000 will ensure that 25 women are empowered to start their own businesses.

Your investment of $34,960 will ensure that 304 farmers are trained and equipped to provide food for their families and communities.

Your investment of $44,640 will ensure that 6 program centers are able to provide a nutritious meal for every student every school day.
